## ★ FOOD FOR THOUGHT ★

On every level, whether it be the food, the service or the quality of our staff, we set ourselves incredibly high standards. It's not enough for us to meet clients' expectations, we have to exceed them. It keeps us ahead of the field and we have to be... there's a lot of competition out there and it's never wise to underestimate it. The food we deliver is fresh, creatively prepared and beautifully presented – that's a given. But, it also has to be the sort of food our customers really want to eat. Whether it's snacks from our 'Grab and Go BBQ Stations', Casual or fine dining menus, it's vital that our options reflect employees' work patterns and cater for their specific tastes. And of course, menus should be exciting and innovative, acknowledging global influences and changing trends. We firmly believe that the values that made us the best small company will be the same ones that make us the best big company...caring passionately about our food, our people and our clients.

### The Beauty of Seasonal Food

Working with Ontario food that's in season is better in every way; it offers freshness, good nutritional quality, great taste and better value for money. We have a great wealth of fantastic produce on our doorsteps so we're all for celebrating and enjoying it. If we don't, some our best Canadian produce will simply disappear. The Ontario countryside and its farmers and growers need our support and at Shopsy's we're more than happy to provide it.

### Sustainability Policy

Shopsy's Catering uses only biodegradable disposable products as part of our environmental policy. Our cups and take-out containers are all biodegradable, whilst we recycle and reuse our serving trays, minimizing the waste. In addition, our produce is farmed from local sources, our fish is bought from sustainable sources, and we offer Fair Trade produce and a menu free of genetically modified ingredients if so desired.

Our food is handmade by passionate artisans who practise sustainable, ethical and social responsibility. While our efforts represent merely the tip of the iceberg when it comes to preserving our planet for future generations, we strongly believe that the measures we've taken to support a healthy environment serve the interests of everybody, both now and for many years to come.
